

ChatGPT: We're all thinking about it

Wow, what a hot topic this is! Everyone is blogging about it, podcasting about it, Tweeting about it, slightly freaking out about it...

Artificial Intelligence (AI) presents a wonderful opportunity to redesign learning and the assessment of learning. As with anything we might initially fear, if we can understand it, we can harness its best qualities while navigating its problems.

Here is what I've been reading, listening to and exploring to better-understand ChatGPT and how it relates to open educational resources/practices (OER/P).

Read, listen, watch. Join the conversation.

[The AI \(ChatGPT\) future: What do we do now? TELedvisors webinar](#)

Hosted by Associate Professor Tim Fawns, Monash Education Academy, Monash University, this webinar is a collaboration between the ASCILITE TELedvisors Network and the Centre for Change and Complexity in Learning (C3L) at UniSA, with support from Monash University (2 Feb 2023).
